

Infosys Hiring Research Notes

B.Tech Fresher Placement Guide 2025–2026

Question 1: What is the hiring process at Infosys for B.Tech freshers in 2025–2026?

Answer

The Infosys recruitment process for 2026 is entirely virtual and consists of four main stages:

1. **Infosys Recruitment Test:** An online assessment covering Reasoning Ability (Arithmetic & Analytical), Mathematical Ability, Verbal Ability, and Pseudocode.
2. **Coding Round:** (Only for DSE and SP roles) High-level competitive programming challenges.
3. **Technical Interview:** Assessment of core engineering subjects, projects, and programming knowledge.
4. **HR Interview:** Behavioral assessment and verification of documents.

For the Class of 2026, Infosys conducts on-campus, face-to-face assessments evaluating both technical skills and behavioral attributes. Candidates are selected via on-campus hiring, off-campus drives, and specialized coding challenges like HackWithInfy and InfyTQ.

Question 5: What are 5 preparation tips for students targeting Infosys?

Answer

5 Essential Preparation Tips for Infosys:

9. **Prioritize Aptitude Speed & Accuracy:** Practice consistently using resources like Preplnsta, Nxtwave Last-Min Pro. Focus especially on puzzles, logical series, and data interpretation.
10. **Master CS Core Concepts:** Revise core CS subjects including OS, DBMS, CN (Computer Networks), and OOPs. Prepare HR answers in STAR format (90 seconds each).
11. **Practice Coding Regularly:** Brush up on foundation topics: arrays, strings, functions, sorting. Practice on HackerRank and LeetCode. Focus on Java/Python.
12. **Prepare Project Narratives:** Create simple project narratives with measurable outcomes. Prepare detailed project document including metrics, tech stack, and your ownership.
13. **Register for Specialized Challenges Early:** Register for InfyTQ early. HackWithInfy gives SP/DSE roles (higher packages). Take one timed quiz every morning until drive date.
